- ✓ Trained on Java Full Stack in Marlabs innovations private limited.

Work Experience:

Project: **Application Maint Support to SmartEquip**

(June 09-2022 to Sep 09-2022)

Description:

- SmartEquip's main product, e-FleetPro, is a B2B web application platform for equipment manufacturers, dealers, and fleet owners. Here the fleet owners can search for the parts relevant to their equipment and place their orders.
- Its responsive, cloud-hosted (AWS) and white-labeled (theming, internationalized and configured per role/partner.
- Domain - construction, industrial equipment, and power tools industries.
- An Equipment Bill of Materials (BOM) **identifies all the replacement spare parts for an equipment**, so maintenance engineers can quickly identify the right part required and locate it from inventory or put in a purchase request, using the part number and vendor details.

Tools used for Project:

- ➢ STS (Spring tool Suite)
- ➢ MySQL
- ➢ Maven
- ➢ Git
- ➢ Postman
- ➢ Amazon workspace

ACHIEVEMENTS & AWARDS:

NSS Volunteer Award from JNTU Hyderabad.

AREA OF INTERESTS:

Java Development and Embedded Systems.

Place: Hyderabad
